

Integration of E-Commerce applications to existing web sites structure provides businesses with secure and efficient vendor-customer communication, streamlines and automates end-to-end business transactions, reduces redundant work and errors sources.

Gene Byte specialists have extensive Experience in bringing e-Shops, e-Procurement systems, marketplaces and auctions into accord with applications that companies currently use. We integrate E-Commerce solutions logic into legacy applications structure and seamlessly integrate your existing web site with newly deployed E-Commerce solutions to give you all facilities to manage your E-Commerce initiatives on a unified basis.

Our efforts are focused to empower your business with a scalable, seamlessly integrated solution that gives you secure, reliable real-time exchange of information and transactions facilities with the following integration services :

- Payment Gateway Integration

Gene Byte has helped clients in the past to integrate their shopping cart with various new payment gateways for credit card and other forms of payment processing like: PayPal, Authorize.net, 2Checkout , LinkPoint, Google Checkout, VeriSign, PayFlow, ProWorld, PayPaycom.

- Vendor's System Integration

We make sure that your e-Shop is well connected with the vendors and the shipment houses to provide a secure and reliable e-retail experience to your customers.
